

Patient Data Dashboard

QUICK GUIDE

Dashboard

Patient Data

Access Dashboard

Click on the “Dashboard” tab at the bottom of the workbook to open the interactive view.

Charts and two slicer panels appear on the left.

0-3 months

1+ years

3-6 months

6-9 months

9-12 months

Filter With Slicers

Use the slicers to choose data you want to see

- Area of Patient Care – filter by clinic (PHC, WIC, etc.)
- Duration of Care – filter by patient service length

Select Multiple Items

- Ctrl-click → pick non-adjacent options
- Shift-click → pick a continuous range
- Click-and-drag → swipe across slicer buttons

Review

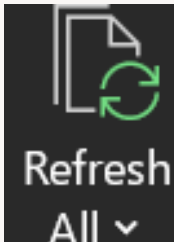

View

Automate

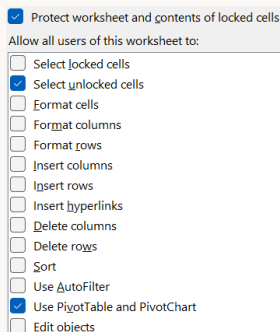

Edit Patient Data

- Open the “Patient Data” sheet
- Ribbon › Review › Unprotect Sheet
- Make edits (add rows or fix entries)

Protect and Refresh

- Return to Review › Protect Sheet
 - Check “Select unlocked cells”
 - Check “Use PivotTable and PivotChart”
- Back on the Dashboard, choose Data › Refresh All to update every chart

Helpful Reminders

- Do not move or delete slicers or charts on the Dashboard
- Always refresh charts after editing the data (Right-click chart → Refresh)
- Save your workbook after making changes
- Only edit data in the “Patient Data” tab (never in Pivot Table or Dashboard sheets)
